The Hyper Deflationary
Payment Network Token

Introduction

Bitrise is a hyper-deflationary payment network token, which rewards investors for holding tokens in **BNB**, while also incorporating the Buyback approach currently present in the stock market. **Bitrise** is the first cryptocurrency ever to include automatic Buyback with real use case of payment systems.

Bitrise Token will be used as peer-to-peer (**P2P**) service for payment systems using our dApp wallet in the local currency with zero transaction fees, faster & secure transactions, whereby two individuals interact directly with each other, without intermediation by a third party. Instead, the buyer and the seller transact directly with each other via the **P2P** service.

TOKENOMICS

Total 12% Transaction Fee (5% BuyBack, 3% Marketing, 4% BNB Distribution to Holders)

BUYBACK TAX: 5%

MARKETING TAX : 3%

BNB DISTRIBUTION : 4%

WHAT IS BUYBACK?

If a stock has low value and the potential to perform better in the future, companies often announce a buyback of the stock in the open market.

Once companies announce the buyback, investors gain more confidence to purchase and hold.

Additionally - the demand increases which ultimately will drive the price up.

At **Bitrise**, we choose to apply the Buyback concept to cryptocurrency, and make our token more attractive to hold.

HOW DOES BUYBACK WORK?

Bitrise collects a 6% Buyback tax on each transaction, which is stored inside the contract. Whenever a sell occurs, a fraction of the buyback amount is used to automatically purchase tokens from the liquidity pool. Those tokens are immediately burned after purchase.

What's So Great About That?

There are 3 advantages:

1. Raise in Value

After the tokens from the Liquidity pool are bought, the new BNB amount is added to the pool and the amount of the tokens are reduced, which results in an increase in price.

2. Free BNB

Once those tokens are burnt, it is like adding free BNB to the pool as there are no tokens to sell in the future.

3. Trust & Reliability

Investors can be relentlessly hesitant and often get spooked by a bearish market.

Because of the automatic buyback, investors will never see more than 2 sells in a row (98% of the time)

ROADMAP

Launch Phase

Website Launch
Contract Deployment
DEX Listing (PancakeSwap)
Advertising Campaigns
1,000 Holders
CoinGecko Listing

Growth Phase

3000 Holders
Influencer Promotions
Coinmarketcap Listing
Initial CEX Listing

Expansion Phase

20000 Holders
Bitrise Audit Solutions
Bitrise dApp Wallet Development
Major CEX Listings
Techrate Audit
Billboard Ads
Celebrity Promotions

Utility Phase

35000 Holders
Bitrise Payment System (P2P)
Bitrise DEX Integration in dApp wallet
Media Coverage Campaigns

Lending & Exchange Phase

50000 Holders
Bitrise P2P Lending Platform Development
Bitrise Centralised Exchange Development

Blockchain Phase

100000 Holders
IBitrise Smart Chain Development

Benefits for Everyone

BitRise Token is not only limited for Buy / Sell / Hold, But also has a real use case of payment system utility globally & also can be used for P2P lending.

#Earn

#Spend

#Lend

We've Built A Platform To Rewards our Investors

Static Rewards

Get rewarded 4% of every transaction just for holding in **BNB**

Buy Back system

5% of each transaction adds to the buyback wallet so we can do regular buy backs

Regular Burns

All tokens that we buy back we will burn, making price impact greater.

Thank you

Have a great
day ahead.

STAY TUNED
